4-H Livestock Health Record

DISEASES/PARASITES: It is important to keep careful records of what type of disease or parasite animal's contract, and how they are to be treated to prevent infecting other animals.

IMMUNIZATION(S): Immunizations (Vaccinations) are to be given upon the recommendation of a veterinarian, unless you are working under the supervision of someone who knows how to treat this breed of animal.

KEEP RECORDS:

1. Keep Individual Health Records separate for each animal.
2. Include the date, time and type of disease or parasite.
3. Write down specific instructions given on how to treat (mediations, vaccinations and medical care to be given)
4. Keep receipts of all medical supplies purchased
